## Industrial Fencing Solutions Catalogue

Premium Wire Mesh & Fencing Systems for Industrial, Defence,  
Infrastructure, Solar & Government Projects Across India.

500+

Solar Projects

10,000+

PEB Projects

400+

Govt Sites

30+

Years Exp.

### Our Product Range:

- > Chain Link Fencing
- > Barbed Wire
- > Welded Wire Mesh
- > Concertina Coil
- > Anti-Climb Fence
- > 3D Fence Panels
- > Gabion Box Systems
- > GI Wire & Angles

ABOUT US

# Trusted Partner for Large-Scale Industrial Projects

We take pride in being a trusted partner for large-scale infrastructure and industrial developments across India. With decades of combined expertise in manufacturing and supply of advanced fencing systems and structural solutions, we have built a strong portfolio defined by scale, reliability, and performance. Our execution capabilities, coupled with a deep understanding of project requirements, have enabled us to deliver consistently across diverse sectors — from renewable energy to national infrastructure and industrial construction.

## Solar Energy Sector

500+ Projects

Secured solar power assets across India with fencing systems engineered for extreme environments — long-term durability, superior corrosion resistance, minimal maintenance.

## PEB & Industrial Infra

10,000+ Projects

Trusted supply partner for leading PEB companies — warehouses, logistics parks, manufacturing units, industrial sheds, and turnkey infrastructure developments.

## Government & High-Security

400+ Sites

Fencing solutions for NHAI highways, defence establishments, and critical public infrastructure, manufactured to meet stringent government compliance standards.

## Private & Corporate

Pan-India

Long-standing relationships with leading private and corporate clients offering custom-engineered solutions with consistent quality and dependable supply timelines.

## PRODUCT

# Chain Link

## Fencing

### Key Features

- › Premium galvanized / PVC-coated steel wire
- › Diamond mesh for consistent strength
- › High tensile flexibility for uneven terrain
- › Weather & corrosion resistant finish
- › Multiple heights, mesh sizes & coatings

### Key Benefits

- › Economical without compromising security
- › Clear visibility for safety & monitoring
- › Long service life, minimal maintenance
- › Fast installation reduces project cost
- › Ideal strength, flexibility & aesthetics

### Applications

- › Residential, commercial & industrial perimeter
- › Factories, warehouses & logistics parks
- › Sports complexes & playgrounds
- › Highways, railways & infrastructure
- › Agricultural fields & utility areas

## PRODUCT

# Barbed Wire

### Key Features

- › High tensile galvanized steel wire
- › Sharp, uniformly spaced barbs
- › Heavy zinc coating, corrosion resistant
- › Resists stretching over long spans
- › Available in GI & PVC-Coated variants

### Key Benefits

- › Highly cost-effective perimeter protection
- › Strong visual & physical deterrent
- › Long service life, minimal maintenance
- › Covers large areas quickly
- › Reliable in harsh outdoor environments

### Applications

- › Agricultural land & farm boundaries
- › Industrial & warehouse perimeter
- › Railway lines & highway boundaries
- › Military & defence installations
- › Security topping for compound walls

PRODUCT

# Welded Wire Mesh

### Key Features

- › High-quality mild steel / GI wires
- › Electrically welded at every intersection
- › Smooth finish with precise mesh openings
- › High load-bearing & dimensional stability
- › Plain, galvanized & PVC-coated options

### Key Benefits

- › Superior structural strength & durability
- › Corrosion-resistant extended service life
- › Easy handling reduces labour cost
- › Maintains shape under stress
- › Consistent quality across projects

### Applications

- › Concrete reinforcement for slabs & floors
- › Industrial & residential fencing
- › Safety guards & machine enclosures
- › Animal cages & poultry fencing
- › Infrastructure & civil engineering projects

PRODUCT

# Concertina Coil

### Key Features

- › High-tensile galvanized steel razor blades
- › Hot-dip galvanized / SS core
- › Uniform coil with high spring resilience
- › BTO / CBT blade types available
- › Various coil diameters & blade profiles

### Key Benefits

- › Extremely high security with deterrence
- › Difficult to cut, climb or penetrate
- › Long service life, minimal maintenance
- › Quick installation on walls & fences
- › Cost-effective vs solid barriers

### Applications

- › High-security industrial perimeter
- › Defence, military & government sites
- › Airports, seaports & power plants
- › Prisons, border fencing & restricted zones
- › Security topping for existing fences

PRODUCT

# Anti-Climb Fence

### Key Features

- › High-strength galvanized steel wire
- › Dense small-aperture mesh design
- › Rigid welded, cut & bend resistant
- › Hot-dip galvanized / PVC-coated
- › Tamper-resistant fixing options

### Key Benefits

- › Prevents climbing, cutting & vandalism
- › High-security with professional appearance
- › Long service life, minimal maintenance
- › Clear visibility for surveillance
- › Quick & easy installation

### Applications

- › High-security industrial premises
- › Airports, power plants & substations
- › Schools, hospitals & institutional campuses
- › Data centres & logistics facilities
- › Government & defence installations

PRODUCT

# 3D Fence Panels

### Key Features

- › High-quality welded steel wire panels
- › 3D V-bends for enhanced rigidity
- › Electrically welded intersections
- › Hot-dip galvanized & PVC-coated
- › Multiple panel heights & colour options

### Key Benefits

- › High strength without heavy frameworks
- › Modern professional appearance
- › Long service life, minimal maintenance
- › Clear visibility for surveillance
- › Quick installation reduces project time

### Applications

- › Perimeter for residential & commercial
- › Schools, colleges, parks & campuses
- › Warehouses & logistics parks
- › Airports, railways & highways
- › Sports complexes & recreational areas

PRODUCT

# Gabion Box Systems

### Key Features

- › Galvanized / PVC-coated steel wire mesh
- › Modular cage — welded or woven panels
- › Filled with locally available stone
- › Corrosion-resistant for outdoor use
- › Flexible & permeable structure

### Key Benefits

- › Robust support for retaining walls
- › Environmentally friendly & natural look
- › Resists erosion & seismic activity
- › Low maintenance, long service life
- › Cost-effective for large-scale civil projects

### Applications

- › Retaining walls & slope stabilization
- › Riverbank protection & flood management
- › Landscaping & garden walls
- › Bridges, culverts & civil engineering
- › Infrastructure & urban development

PRODUCT

# GI Wire & MS Angles

### Key Features

- › High-quality mild steel, hot-dip galvanized
- › Corrosion & rust resistant coating
- › Multiple gauges, diameters & coil lengths
- › Flexible, easy to bend, cut or tie
- › GI, MS & PVC-Coated variants

### Key Benefits

- › Reliable long-lasting performance
- › Resistant to corrosion & weathering
- › Easy to handle, saves labour cost
- › Cost-effective for industrial & construction
- › Adaptable to wide range of applications

### Applications

- › Binding & tying in construction works
- › Fencing & perimeter security
- › Agriculture: tying plants & trellises
- › Manufacturing: cages & fabrication
- › Structural frameworks for sheds & buildings

WHY CHOOSE US

# Why We Are Preferred

## Proven Track Record

10,000+

Proven track record across high-volume, multi-location projects across India.

## Premium Quality Standards

ISO Grade

Commitment to premium quality and compliance standards on every project.

## Scalable Manufacturing

Pan-India

Robust manufacturing infrastructure with scalable capacity for large orders.

## On-Time Delivery

100% Commit

Reliable supply chain ensuring on-time deliveries to project sites.

## Custom Engineering

BOQ Ready

Technical expertise to deliver customized, BOQ-driven project solutions.

## Sector-Wide Expertise

5+ Sectors

Deep experience across solar, defence, highways, industrial and government sectors.
